## CR70 Vinyl Window

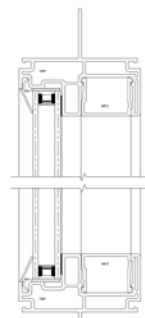

In today's market, we all know the importance of energy efficient systems and u-values. **WinTech CR70** is commercially tested and rated with u-values as low as .27. In addition to a great rating, the CR70 is constructed with fusion welded corners to minimize air from penetrating the system giving a tight seal and better performance. The CR70 has multiple fin options and trim packages for ease of installation. When looking for a no-maintenance window, free from cracking, chipping, or painting, look no further than the CR70.
